EarthWool™ Batts & Rolls

EARTHWOOL
insulation bonded with nature

EarthWool™ is a new, advanced generation of super soft and highly sustainable glasswool. It is thermally efficient and cost effective in saving energy and providing increased comfort in buildings. EarthWool™ is non-combustible and also reduces unwanted noise from outside the home and limits sound transmission from room to room. Made using recycled glass bottles, sand and using ECOSE™ Technology, EarthWool™ sets a new benchmark for insulation sustainability and ease of handling.
